Mobile Marketing Tom Scheffel 2012-11 Mobilität, Flexibilität und Unabhängigkeit haben sich in den vergangenen Jahren zu den zentralen Charaktereigenschaften der heutigen Gesellschaft entwickelt. Die mobile Kommunikation passte sich fortwährend diesem Trend an, weshalb auch die mobilen Endgeräte zunehmend an Bedeutung gewinnen. Mit einer Penetrationsrate von über 100 Prozent hat die mobile Kommunikation über alle Bevölkerungsschichten hinweg die Verbreitung von Internet oder Festnetzanschlüssen betroffen. Demzufolge sind mobile Endgeräte längst deutlich stärker als andere Kommunikationsgeräte verbreitet. Dabei beschränkt sich die mobile Kommunikation gegenwärtig keinesfalls mehr nur auf die reine Übertragung von Sprache. Mit dem starken Penetrationsschub der mobilen Endgeräte ging ein Wandel des Mobilfunkmarktes einher, der neben der reinen Sprachübertragung nunmehr insbesondere eine Übertragung von

multimedialen Daten erlaubt. In Verbindung mit immer leistungsfähiger werdenden Übertragungsstandards im Mobilfunk und der zunehmenden Verbreitung mobiler Endgeräte rücken auch Mobile-Marketing-Aktivitäten in den Fokus der Marketer. In einer Zeit, die sich sowohl durch eine starke Reiz- und Informationsüberflutung als auch durch ihre Schnelligkeit auszeichnet, liegt es regelrecht auf der Hand, das mobile Endgerät aus Unternehmenssicht für zielgruppengenaue Marketing-Aktivitäten zu verwenden. Das ist vor allem damit zu begründen, dass dieses sehr persönliche Medium mittlerweile nicht nur als Kommunikations-, sondern auch als Werbeinstrument im Rahmen des Mobile Marketings genutzt werden kann. Bislang haben Mobile-Marketing-Akteure das mobile Endgerät fast ausschließlich für Ankündigungen in Form von Sprachmitteilungen oder zur Übermittlung von SMS-/MMS-Botschaften genutzt. Doch im Zuge der anhaltenden Weiterentwicklung mobiler Technologien haben sich eine Vielzahl von Mobile-Marketing-Instrumenten aufgetan, die

es beispielsweise erlauben, mobile Gutscheine ber Applikationen oder mobile Websites zu verb

Mobile Tech Report 2014 John R. Roberts 2014-01-10 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question

quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of

events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: Blackberry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix

Context and Semantics for Knowledge Management Paul Warren 2011-09-15
Knowledge and information are among the biggest assets of enterprises and organizations. However, efficiently managing, maintaining, accessing, and reusing this intangible treasure is difficult. Information overload makes it difficult to focus on the information that really matters; the fact that much corporate knowledge only resides in employees' heads seriously hampers reuse. The work described in this book is motivated by the need to increase the productivity of knowledge work. Based on results from the EU-funded ACTIVE project and complemented by recent related results from other researchers, the application of three

approaches is presented: the synergy of Web 2.0 and semantic technology; context-based information delivery; and the use of technology to support informal user processes. The contributions are organized in five parts. Part I comprises a general introduction and a description of the opportunities and challenges faced by organizations in exploiting Web 2.0 capabilities. Part II looks at the technologies, and also some methodologies, developed in ACTIVE. Part III describes how these technologies have been evaluated in three case studies within the project. Part IV starts with a chapter describing the principal market trends for knowledge management solutions, and then includes a number of chapters describing work complementary to ACTIVE. Finally, Part V draws conclusions and indicates further areas for research. Overall, this book mainly aims at researchers in academia and industry looking for a state-of-the-art overview of the use of semantic and Web 2.0 technologies for knowledge management and personal productivity. Practitioners in industry will also benefit, in particular from the case studies which highlight cutting-edge applications in these fields.

Teaching for Global Community César Augusto Rossatto 2011-06-01 Education has long been viewed as a vehicle

for building community. However, the critical role of education and schools for constructing community resistance is undermined by recent trends toward the centralization of educational policy-making (e.g. racial profiling new laws in the US—Arizona and Texas; No Child Left Behind and global racism), the normalization of “globalization” as a vehicle for the advancement of economic neo-liberalism and social hegemony, and the commodification of schooling in the service of corporate capitalism. Alternative visions of schooling are urgently needed to transform these dangerous trends so as to reconstruct public education as an emancipatory social project. Teaching for Global Community: Overcoming the Divide and Conquer Strategies of the Oppressor examines these issues among related others as a way to honor and re-examine Freirean principles and aim to take critical pedagogy in new directions for a new generation. The goal is to build upon past accomplishments of Paulo Freire’s work and critical pedagogy while moving beyond its historical limitations. This includes efforts that revisit and re-evaluate established topics in the field or take on new areas of contestation. Issues related to education, labor, and emancipation, broadly defined and from diverse geographical context, are addressed. The theoretical perspectives used to look at these emerge from critical pedagogy, critical race theory, critiques of globalization and neoliberalism, marxist and neo-marxist perspectives, social constructivism, comparative/international education, postmodernism indigenous perspectives, feminist theory, queer theory, poststructuralism, critical environmental studies, postcolonial studies, liberation theology, with a deep commitment to social justice.

Practical Django Projects James Bennett 2009-07-31 Build a Django content management system, blog, and social networking site with James Bennett as he introduces version 1.1 of the popular Django framework. You'll work through the development of each project, implementing and running the applications while learning new features along the way. Web frameworks are playing a major role in the creation of today's most compelling web applications, because they automate many of the tedious tasks, allowing developers to instead focus on providing users with creative and powerful features. Python developers have been particularly fortunate in this area, having been able to take advantage of Django, a very popular open-source web framework whose stated goal is to "make it easier to build better web applications more quickly with less code." Practical Django Projects introduces this popular framework by way of a series of real-world projects. Readers follow along with the development of each project, implementing and running each application while learning new features along the way. This edition is updated for Django 1.1 and includes an all-new chapter covering practical development tools and techniques you'll be able to apply to your own development workflow.

Impact Investment Keith Allman 2015-03-02 *Impact Investment: A Practical Guide to Investment Process and Social Impact Analysis* takes readers at investment banks, wealth management firms, family offices, private equity funds, development finance institutions, and charities through the demanding task of properly executing an impact investment strategy, and concurrently provides methods and solutions to some of the most vexing challenges of investing for financial return and social impact. It will show how standard

rigorous financial analysis should be applied, problems that emerge requiring a deep understanding and adjustment to those standard techniques, and how a social mission influences the entire investment from investment to exit. Additionally an impact investment oriented company, a village distribution company, will be used as a running example with a full-fledged case study of the company that consolidates all examples. Investment banks have social finance units, some large institutions have their own investment companies that specialize in impact investing, family offices are directing segments of their funds to this form of investing, multiple private equity funds are specializing in impact investing, charities are moving toward investment/pseudo investment models, mainstream funds have impact investing sub-funds, large development institutions around the world are investing in impact funds and also directly in social enterprises, and finally the social entrepreneurs themselves need to understand the entities they work with and a professionalized funding process in detail. Additionally many advisory and service providers have emerged that provide one specific specialty of many of the items that *Impact Investment: A Practical Guide to Investment Process and Social Impact Analysis* will cover.
