Advances in Information Retrieval

Cathal Gurrin 2010-04-03 These proceedings contain the papers presented at ECIR 2010, the 32nd European Conference on Information Retrieval. The conference was

organized by the Knowledge Media Institute (KMi), the Open University, in co-operation with Dublin City University and the University of Essex, and was supported by the Information Retrieval Specialist Group of the British Computer Society (BCS- IRSG) and the Special Interest Group on Information Retrieval (ACM SIGIR). It was held during March 28-31, 2010 in Milton Keynes, UK. ECIR 2010 received a total of 202 full-paper submissions from Continental Europe (40%), UK (14%), North and South America (15%), Asia and Australia (28%), Middle East and Africa (3%). All submitted papers were reviewed by at least three members of the international Program Committee. Out of the 202 papers 44 were selected as full research papers. ECIR has always been a conference with

a strong student focus. To allow as much interaction between delegates as possible and to keep in the spirit of the conference we decided to run ECIR 2010 as a single-track event. As a result we decided to have two presentation formats for full papers. Some of them were presented orally, the others in poster format. The presentation format does not represent any difference in quality. Instead, the presentation format was decided after the full papers had been accepted at the Program Committee meeting held at the University of Essex. The views of the reviewers were then taken into consideration to select the most appropriate presentation format for each paper.

Harmonisierung strafrechtlicher Sanktionen in der Europäischen Union

Helmut Satzger 2020-02-13 Die Frage, welche Strafe einen Täter für seine Tat trifft, fällt unter den Mitgliedstaaten der EU höchst unterschiedlich aus. Zum Abbau daraus folgender Hindernisse für eine justizielle Zusammenarbeit in Strafsachen ist die Angleichung der Rechtsfolgen von Straftaten zusehends in den Fokus der EU geraten. Ein überzeugendes System konnte sich bislang aber nicht herausbilden. Für die internationale Wissenschaftlergruppe European Criminal Policy Initiative war dies Anlass, sich auf die Suche nach einem

rechtspolitisch verträglichen Modell zur Harmonisierung strafrechtlicher Sanktionen in der EU zu begeben, das nationale und europäische Interessen bestmöglich ausgleicht. Auf der Basis eines umfassenden Rechtsvergleichs und einer Analyse des existenten Unionsrechts wurde ein Kategorienmodell entwickelt, das dem Gedanken relativer Vergleichbarkeit der Sanktionen entspringt. Der vorliegende Band erläutert dieses neue Modell und sein Entwicklungspotential in englischer und deutscher Sprache.

During the past year, participating organizations contributed to the building of large-scale XML test collections by creating topics, performing retrieval runs and providing relevance assessments. The workshop concluded the results of this effort, summarized and addressed issues encountered, and devised a work plan for the future evaluation of XML retrieval systems. The 42 full papers presented together with 3 invited papers were carefully reviewed and selected from 49 submissions. They have been divided into sections according to the eight tracks of the workshop, investigating various aspects of XML retrieval, from book
